Cybersecurity for
Healthcare Technology Companies

Rocus CyberFusion™ is the all-in-one cybersecurity solution that ensures your company is protected.

Cyber threats in the healthcare industry are on the rise. Hackers can access valuable intellectual property and customer information, and tamper with networked medical systems and devices. Increased connectivity opens doors to exploit patient data, causing havoc for patients and disaster for organizations, which suffer from lost business, a bad reputation, and fines for HIPAA requirement violations that can reach into the millions.

Rocus CyberFusion™ was created as an end-to-end solution to protect companies like yours from cyberattacks, data leakage, and breaches. You can rest assured that your network and data are protected and your organization is compliant.

Why Rocus CyberFusion™?

- **PREVENTION FIRST:** Prevent attacks, rather than relying on human intervention after a breach occurs
- **24x7x365 SECURITY:** Our SOC team detects, responds, contains and remediates threats. You would need to employ 4-6 cybersecurity experts, monitoring all day, every day, to get the same protection
- **ALL-IN-ONE:** Rocus CyberFusion™ integrates it all for you and continually provides updates with the latest, most effective technology
- **WHITE-GLOVE SERVICE:** We provide "virtual CISO" advisory services and real people to talk to when you need help
- **AFFORDABLE:** Pay one, low monthly rate
- **FREE SECURITY AUDIT:** Our team of security engineers will evaluate your current environment and provide recommendations

67%
CISOs believe a cybersecurity attack will happen to their organization in 2018[1]

$725K+
Cost to clean up a data breach[2]

525%
Increase in medical device cybersecurity vulnerabilities[3]

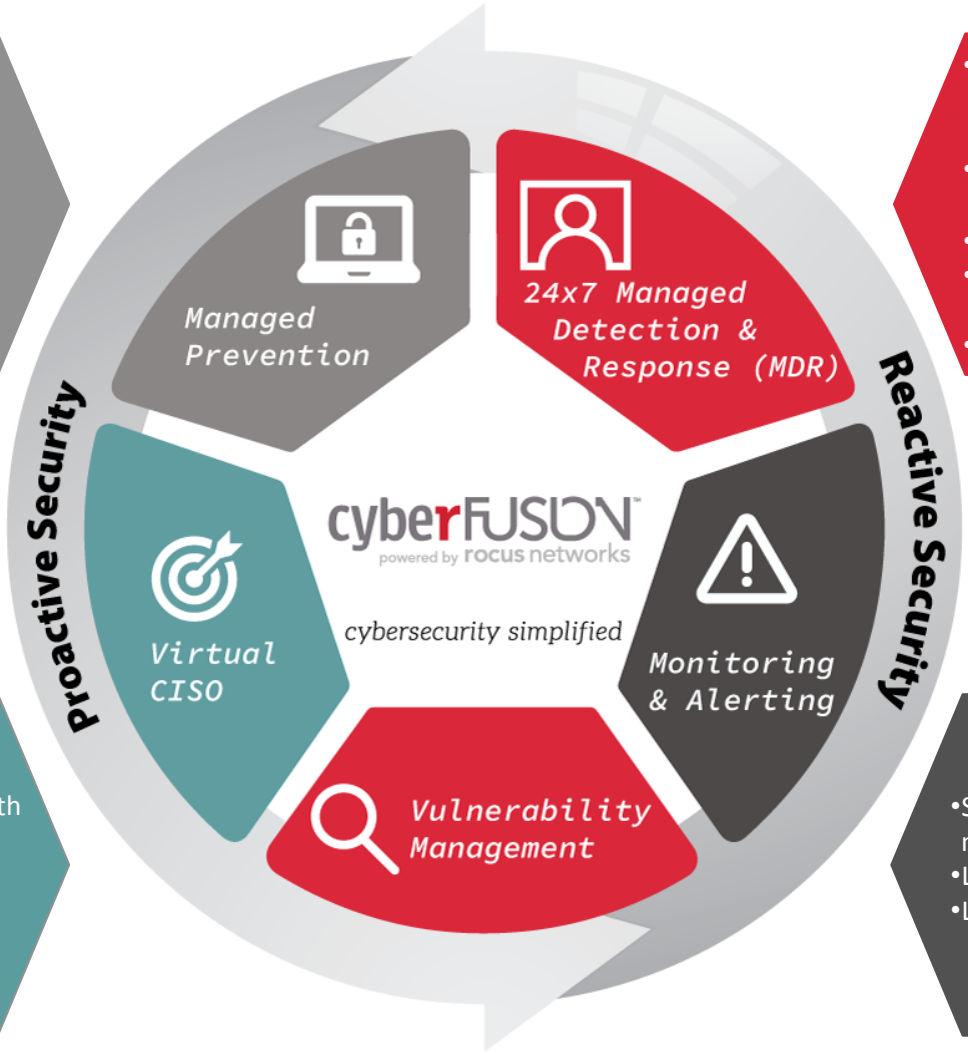
Cybersecurity, simplified and affordable

cyberFUSION™ powered by rocus networks

Rocus CyberFusion™ combines best-in-class, enterprise-grade prevention tools, using the industry's best resources to protect your organization.



- Endpoint security
- Email security
- Network security

- Endpoint, email, and network detection & response
- Intrusion detection services
- Incident resolution
- Threat intelligence & hunting
- White-glove service

- Security alignment with business goals
- Strategic planning & budgeting
- Quarterly reviews

- Security event monitoring & alerting
- Log management
- Log monitoring

- Vulnerability scanning & identification

Instant Visibility

Access your organization's critical cybersecurity information, anytime.

CyberFusion™ includes a dashboard on your screen giving you instant, by-user visibility to malicious activity, blocked viruses, applications used, websites accessed, files accessed and shared, and bandwidth consumed.

See where and what information your employees are accessing to ensure data is being properly used and shared.
